Unemployment Rates in 2016 for Youth 16 - 24

- Asian Youth: 12.2%
- White Youth: 12.6%
- Hispanic Youth: 13.7%
- Black Youth: 24.3%

Based on data from the U.S. Bureau of Labor Statistics

Unemployment Rates in 2017 for Youth 16 - 24

- Asian Youth: 7.1%
- White Youth: 10.7%
- Hispanic Youth: 13.3%
- Black Youth: 19.1%

Based on data from the U.S. Bureau of Labor Statistics

Unemployment Rates in 2018 for Youth 16 - 24

- Asian Youth: 10.1%
- White Youth: 9%
- Hispanic Youth: 12.1%
- Black Youth: 16.8%

Based on data from the U.S. Bureau of Labor Statistics

Green 2.0

Despite increasing racial diversity in the United States, the racial composition in environmental organizations and agencies has not broken the 12% to 16% “green ceiling” that has been in place for decades.

Restoring A Population One P

By: Malik J. Robinson

Introduction

- Issue: Whitebark pine mortality in Yellowstone region

Primary causes of mortality

White pine blister rust (Cronartium ribicola),

Pine Beetle (Dendroctonus Ponderosae)

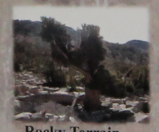

Fire

- Monitoring shows that 70% of larger whitebark pine trees (>10 cm in diameter) died from these factors since 2000 (Shanahan et. al. 2017)
- Objective : Restoration planting of baby whitebark pine trees raises important questions. Where should they be planted to grow quickly and reproduce before dying? The answer to this question relies on influences that affect the growth rate of trees which include : soil texture, snow pack, precipitation, drought, evapotranspiration, soil moisture and temperature.

Methods

- Tree Coring: Used Increment Borer to core large whitebark pine trees on north and south aspects.

Rocky Terrain

Increment Borer

Grassy terrain

- Ring Width Analysis: After sanding and preparation rings were counted and dated under a microscope.

Sanding

Tree Rings

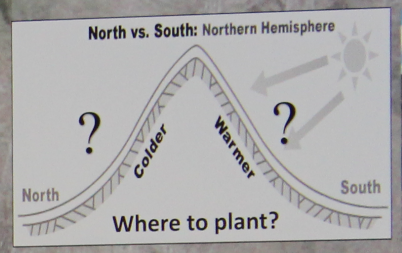

This tree is 271 years old

Study Area

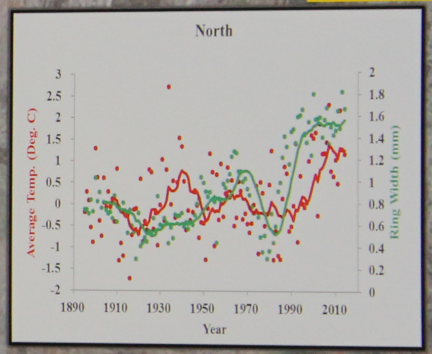

Location: Deer Creek Lake (near Big Sky, Mon

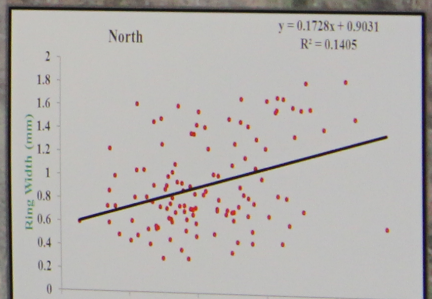

North and South Aspects: For this research we collected on the south and north aspect to add a influence the growth rate of trees.

Navigating Careers in the Environmental Sector: What are the Options?

- Non-governmental organizations & the world of non-profits

Navigating Careers in the Environmental Sector: What are the Options?

- There are many federal agencies that provide careers that most students are not aware of, particularly in the natural resource management sector. For example the National Park Service, USDA Forest Service, National Oceanic Atmospheric & Association and are agencies that have career opportunities that deal with the environment while being connected to the federal government.

Corporate & Academic Options

- For those that are interested in corporate careers while still doing work in the environmental sector, there are corporations that would be appropriate to explore.
- Corporations that focus on carbon credits, also known as carbon offsets, such as Walmart (superstores), Home Depot, Google, and many real estate companies offer opportunities in the environmental field.

Corporate & Academic Options

- Colleges are looking for individuals interested in teaching the environmental sector in increasing amounts.
- Numerous career paths are in the environmental sector.

Youth Led Movements

- Zero Hour

A group of young activists frustrated by the inaction of elected officials organized to enact change, because change must occur. Enough is enough. The youth, believe that #thisisZeroHour to act on climate change. We cannot afford to wait any longer for adults to protect our right to the clean and safe environment, the natural resources we need to not just survive, but flourish. We know that we are the leaders we have been waiting for!

- Sunrise Movement

SUNRISE MOVEMENT

Sunrise is a movement to stop climate change and create millions of good jobs in the process. We're building an army of young people to make climate change an urgent priority across America, end the corrupting influence of fossil fuel executives on our politics, and elect leaders who stand up for the health and wellbeing of all people. We are ordinary young people who are scared about what the climate crisis means for the people and places we love.

WE CAN build a better tomorrow, today
It's time for a Green New Deal
